MFX300 0.6/1 kV Fire Barriers + HEPR Insulated, LSOH (SHF1)

Sheathed, Screened Fire Resistant Power & Control Cables

(Single Core)

Application

These cables are used for fixed installations on ships and offshore units in all locations and on open deck in safety circuits, where fire resistance is required. The good screening qualities of the copper braid also reduce radio interference and electrical influences to electronics installations. These cables are fire resistant, flame retardant, low smoke & halogen free.
