Company Profile

Caledonian. established in 1978.offers one of the most complete lines of fiber and copper cabling system solutions with over hundreds of different cabling system products. . Our superior products provide leading edge within every cable series and for every application.

Among the national and international standards with which our cables could comply are: BS - British Standard; LPCB Fire Performance Standard. ISO Standard etc. Caledonian Cables offers a comprehensive stock of cables and cabling products through its nationwide network of resellers and distributors. Caledonian Cables has continually expanded its global presence in Europe and Asia.

Caledonian & Addison. produces a wide range of cables for communication. power and electronics in its primary plants in UK. Italy and Spain. To stay in front. we continually keep expanding our manufacturing capabilities in more low cost region such as Romania. Taiwan. Malaysia etc. This low-cost manufacturing facilities enable us provide a flexible. scalable global system that delivers superior operational performance and optimal results for our customers.

Our extensive global network of manufacturing facilities gives us significant scale and the flexibility to fulfill our customer requirements. This global presence provides design and consultancy solutions that are combined with core cable manufacturing. logistic services. and vertically integrated with our E commerce technologies. to optimize customer operations by lowering costs and reducing time to market.

Caledonian & Addison has been respected for its high standards of quality. excellent service level. competitive pricing and a unique and innovative spirit. With our latest technologies. we are both inspired and well-positioned to meet the changing needs of our customers. We have the resources to diversify and to enhance our product lines and services. We understand the need for change and with our accurate planning. we are ready for the future and the promise of new marketing opportunities. Our tradition of growth through excellence is assured.

Our Design Centers work closely with customers to constantly improve its standard range of products and technologies and to develop customized. country and industry-specific solutions. Caledonian & Addison has established an extensive network of design. manufacturing. and logistics facilities in the world's major markets to serve the growing outsourcing needs of both multinational and regional customers.

Our Certificate

Registration Certificate

This document certifies that the administration systems of

Caledonian Cables Limited / Addison Technology Limited

Marchants Industrial Centre, Mill Lane, Laughton, Lewes, Sussex, BN8 6AJ, United Kingdom

***have been assessed and approved by QAS International
to the following management systems, standards and guidelines:***

ISO 9001 : 2008

With the permitted exclusion of clauses 7.3 Design and Development

The approved administration systems apply to the following:

***The manufacture and supply of electrical cables and
ancillary power equipment to customers internationally.***

Original Approval **6th September 1997**

Current Certificate **7th February 2013**

Certificate Expiry **7th February 2014**

Certificate Number **A6211**

On behalf of QAS International

www.qas-international.com

This certificate remains valid while the holder maintains their quality administration systems in accordance with the standards and guidelines stated above, which will be audited annually by QAS International.

The holder is entitled to display the above registration mark for the duration of this certificate.

This certificate must be returned to QAS International on reasonable request.

Issuing Office: QAS International, 20A Oxford Street, Malmesbury, Wiltshire, SN16 9AX

TR2029-Inductive Loop Detector Cable

TR2031- Loop Detector Feeder Cable

TR2153-Non armoured Energy Cable

TR2161-Armoured Energy Cable

TR2029-Inductive Loop Detector Cable

Application and Description:

TR2029 inductive loop detector cable is a single core multistranded flexible cable sheathed with polychloroprene designed for installation in a slot cut into the carriageway. It is used to measure and control traffic flow. The cables are buried beneath the road in 'loops' and an electrical current is passed through them creating a magnetic inductive field. The vehicle passing through this field that creates a disturbance and a means by which to measure traffic flow and vehicle type. Typical applications are for traffic control signals, safety cameras, variable speed control systems, flow monitoring and access control. The cables have to be of a robust design to withstand a hostile working environment and accommodate back filling with hot bitumen during cable pulling.

Standard:

TR2029, IEC 60811 and BS 6500, BS EN 60332-1-2

Cable Construction:

- **Conductor:** Tin coated plain annealed copper, comply with IEC 60228 for Class 5
- **Insulation:** Ethylene propylene rubber (EPR), GP1, 85 ° C, comply with BS 7655
- **Insulation Color:** Black

- **Sheath:** Polychloroprene(PCP), RS3, 85 ° C, comply with BS 7655, heavy-duty, oil-resisting and flame retardant
- **Sheath Color:** Black

Technical Characteristics:

- **Rated voltage:** 450/750 volts
- **Minimum bending radius:** 5 x Ø
- **Rated temperature:** +90° C
- **Conductor resistance at 20°C:** 1.5mm²---- 13.7ohms/km
2.5mm²---- 8.21ohms/km
- **Insulation resistance:** >665 MΩ x km
- **Flame retardant:** BS EN 60332-1-2

Cable Parameter:

Number of Cores	Nominal Conductor Area	Nominal Conductor Stranding	Insulation Thickness	Sheath Thickness	Nominal O/D	Approx Cable Weight
	mm ²	NO./mm	mm	mm	mm	Kg/km
EPR insulation only						
1	1.5	30/0.25	1.1	-	3.8-4.0	30
1	2.5	50/0.25	2.1	-	6.1-6.4	48
EPR insulation with PCP sheath						
1	1.5	30/0.25	0.8	1.4	5.8-7.2	65

TR2031- Loop Detector Feeder Cable

Application and Description:

TR2031 loop detector feeder cable is a copper communications cable sheathed with medium density polyethylene (MDPE) designed for installation in a ducted network. Armoured feeder cables are used to feed electrical current to inductive cable loops and designed for direct burial underground.

Standard and Approval:

BS 6500

Cable Construction:

Non Armored TR2031

- **Conductor:** Solid plain annealed copper, comply with IEC 60228 for Class 1
- **Insulation:** Polythene (PE), comply with IEC 60708
- **Core Identification:** 1 pair – red, black
2 pair – red, yellow, blue, black laid up in quad formation in order of rotation
- **Screen (for Non Armoured Cable Only):** Aluminum polymer laminate tape comply with IEC 60708
- **Inner Sheath (for Armoured Cable Only):** Medium density polyethylene (MDPE), comply with IEC 60708

- **Armor (for Armoured Cable Only):** Galvanized steel wires to BS EN 10257-1
- **Outer Sheath:** Medium density polyethylene (MDPE), comply with IEC 60708.
- **Outer Sheath Color:** Orange/Black

Armored TR2031

Technical Characteristics:

- **Rated voltage:** 600/Kft volts
- **Minimum bending radius:** $8 \times \varnothing$
- **Rated temperature:** $+70^{\circ}\text{C}$
- **Conductor resistance at 20°C :** 1.5mm^2 ---- 12.1ohms/km
 2.5mm^2 ---- 7.41ohms/km

- **Insulation resistance:** $>1500\text{ M}\Omega \times \text{km}$
- **Loop inductance:** $630\mu\text{H/km}(1\text{P})$ $720\mu\text{H/km}(2\text{P})$

- Capacitance:

unarmored		armored	
1.5 mm^2	2.5 mm^2	1.5 mm^2	2.5 mm^2
$<75\text{ pF/m}$	39 pF/m (1P)	$<75\text{ pF/m}$	64 pF/m (1P)
	52 pF/m (2P)		53.5 pF/m (2P)

-Current rating:

Unarmored in air (30°C)		armored in ground (15°C , 1.2°C m/W)	
1.5 mm^2	2.5 mm^2	1.5 mm^2	2.5 mm^2
24*	33*	32*	41*

*These ratings are based on only two cores loaded simultaneously. In two pair cables where all four cores could be loaded simultaneously, the above values should be multiplied by 0.78.

Cable Parameter:

Number of Pairs	Nominal Conductor Area	Nominal Conductor Stranding	Insulation Thickness	Inner Sheath Thickness	Nominal diameter of armour wire	Outer Sheath Thickness	Nominal O/D	Approx Cable Weight
	mm ²	NO./mm	mm	mm	mm	mm	mm	Kg/km
Unarmored cables

TR2153-Non Armoured Energy Cable

Application and Description:

TR2031 Non-armoured Energy Cable is a motorway cable sheathed with medium density polyethylene (MDPE) designed for street lighting.

Standard and Approval:

IEC 60502

Cable Construction:

- **Conductor:** Plain annealed stranded copper conductor, comply with IEC 60228 for Class 2
- **Insulation:** Cross linked polyethylene (XLPE)
- **Core Identification:** Brown, Blue, Green/Yellow
- **Tape:** Polyester Binding Tape
- **Sheath:** Medium density polyethylene (MDPE), comply with IEC 60708
- **Sheath Color:** Black

Technical Characteristics:

- **Rated voltage:** 600/Kft volts
- **Minimum bending radius:** 12 x Ø

- Rated temperature: +90° C

- Conductor resistance:

Conductor size	mm ²	10	25	35	50	70	95	120	150	185	240

About the IMSA:

Since 1896, the International Municipal Signal Association (IMSA) has been concerned with many aspects of governmental public safety, communications and signaling. The majority of its members are municipal, county, state/provincial and federal officials and employees located throughout the United States and Canada.

The development of a series of electrical cable and wire specifications is one of the many services provided by IMSA. These specifications assure specifying engineers, purchasers and users that they are receiving quality cable and wire that will perform reliably within the application scope of each specifications.

The cable constructions offer maximum resistance to moisture and weathering and are primarily designed for outside installations, including aerial, underground duct and direct earth burial. They are also excellent options for industrial and other users when selecting control and communications cables for outside installations

IMSA 19-1(Traffic Signal Cable)

Application

These cables are suitable for outdoor or indoor use in traffic signal, traffic control systems, fire alarm systems, underground conduit and aerial use with messenger. Rated for 600 Volts 75°C wet or dry locations.

Cable Construction

- **Conductor:** Solid bare copper per ASTM B-3 or stranded bare copper per ASTM B-8, & B-174
- **Insulation:** High density polyethylene (HDPE)
- **Sheath:** Black polyvinyl chloride (PVC)

IMSA 20-1(Traffic Signal Cable)

Application

These cables are suitable for outdoor or indoor use in traffic signal, traffic control systems, fire alarm systems, underground conduit and aerial use with messenger. Rated for 600 Volts 75°C wet or dry locations

Cable Construction

- **Conductor:** Solid bare copper per ASTM B-3 or stranded bare copper per ASTM B-8, & B-174
- **Insulation:** High density polyethylene (HDPE)
- **Sheath:** High density polyethylene (HDPE)

Color Code

IMSA 19-5/20-5(Traffic Signal Cable)

Application

These cables are designed for use in severe service in underground conduit or as aerial cable supported by a messenger or for direct earth burial either as fire protective signaling cable or as a traffic signaling cable..

Cable Construction

- **Conductor:** Solid bare copper per ASTM B-3(stranded copper is optional)
- **Insulation:** Polyethylene(PE)
- **Inner sheath:** Polyethylene(PE)
- **Shield:** Corrugated copper tape- 15% minimum overlap
- **Outer sheath:** IMSA 19-5-Black Polyvinyl chloride (PVC)/
IMSA 20-5-Black Polyethylene(PE)

IMSA 50-2 (Traffic Loop Detector Lead-In Feeder Cable)

Application

These cables are used in municipal signal systems as lead-in cable or for use in communication circuits where a low capacitance is needed, suitable for underground conduit, as aerial cable supported by messenger, or in raceways in buildings.

Cable Construction

- **Conductor:** Stranded tinned copper per ASTM B-8 & B-33, 18 – 12 AWG (19 Strand)
- **Insulation:** Low density polyethylene (LDPE)
- **Color code:** Black & clear
- **Pairing:** Two insulated conductors twisted together
- **Shield:** Aluminum foil shield with tinned copper drain wire
- **Sheath:** Black low density polyethylene (LDPE)

Temperature Rating

75°C

IMSA 51-1(Loop Detector Cable)

Application

These cables are designed for use in municipal signal systems as “Loop Detector Wire”. These wires are installed in pavement saw cuts at traffic intersections to detect the presence of motor vehicles. The signal is sent to a traffic signal controller to activate the light changes.

Cable Construction

- **Conductor:** Stranded tinned copper per ASTM B-8
- **Insulation:** Black Polyvinyl chloride (PVC)
- **Sheath:** Clear nylon

Temperature Rating

105°C

IMSA 19-6/20-6

(Signal & Communications Cable)

Application

These cables are designed for use in underground conduit or as aerial cable supported by a messenger, or for direct earth burial either as fire protective signaling cable or as traffic signal cable.

Cable Construction

IMSA 19-6

- **Conductor:** Solid bare copper per ASTM B-3(stranded copper is optional)
- **Insulation:** Polyethylene(PE)
- **Pairing:** Two insulated conductors twisted together
- **Binder tape:** Clear mylar wrap – 100% coverage
- **Inner sheath:** Polyethylene(PE)
- **Shield:** Corrugated copper tape- 15% minimum overlap
- **Outer sheath:** IMSA 19-2-Black Polyvinyl chloride (PVC)/

IMSA 20-2-Black Polyethylene(PE)

IMSA 20-6

British Standard

**Traffic Signal Cable to BS 6346
Loop Feeder Cable to BS6346
Loop Detector Cable to BS6500 and BS6195**

Traffic Signal Cable to BS 6346

Application

Traffic signal cable is used for the interconnection of traffic signal equipment or other applications requiring high core configurations with mechanical robustness..

Standard and Approval

BS 6346, BS 6360, BS 7655

Cable Construction

- **Conductor:** Solid plain annealed copper, comply with BS 6360, Class 1
- **Insulation:** Polyvinyl chloride (PVC), TI1, comply with BS 7655
- **Bedding(for Armoured Cable Only):** Polyvinyl chloride (PVC) compound
- **Armor(for Armoured Cable Only):** Galvanized steel wire armor
- **Sheath:** Polyvinyl chloride (PVC), TM1, comply with BS7655
- **Sheath color:** Orange

Core Identification

4 core - Red, Blue, Yellow, Green

8 core - Brown, Yellow, Green, Red, White, Blue, Black, Orange

12 core - Brown, Yellow, Green, Red, White, Blue, Black, Orange, Red/White, Grey, Red/Blue, Violet

16 core - Brown, Yellow, Green, Red, White, Blue, Black, Orange, Red/White, Grey, Red/Blue, Violet, Brown/Red, Yellow/Red, Grey/Red, Black/Red

20 core - Brown, Yellow, Green, Red, White, Blue, Black, Orange, Red/White, Grey, Red/Blue, Violet, Brown/Red, Yellow/Red, Grey/Red, Black/Red, Violet/Red, Orange/Red, Green/Red, Blue/White

Technical Characteristics

- **Rated voltage:** 600/Kft volts
- **Conductor Resistance: at 20°C:** 18.1ohms/km(1.0mm²)
12.1 ohms/km(1.5mm²)
- **Minimum bending radius:** 6 x Ø
- **Temperature range:** -15° C - +70° C
- **Short circuit temperature:** 160°C
- **Flame retardant:** BS EN 60332-1-2

Loop Feeder Cable to BS6346

Application

Loop Feeder Cable is used to connect traffic lights to the central control management system. The cables come in armoured, for direct burial, or unarmoured for applications where additional mechanical protection has been afforded by other means such as ducting. The Loop feeder cables are supplied in a highly visible orange for easy location of buried services. These cables are also suitable for use in small power, lighting or control circuits.

Standard and Approval

BS 6346, BS 6360, BS 6234

Cable Construction

- **Conductor:** Conductor: Solid plain annealed copper, comply with BS 6360, Class 1
- **Insulation:** Polythene (PE), comply with BS 6234, type 03
- **Pairing:** Two insulated conductors twisted together, four cores laid up as a quad
- **Bedding (for Armoured Cable Only):** Polythene (PE), comply with BS 6234, type 03
- **Armor (for Armoured Cable Only):** Galvanized steel wires
- **Sheath:** Polythene (PE), comply with BS 6234, type 03
- **Sheath Colour:** Orange

Loop Detector Cable to BS6500 and BS6195

Application

Loop Detector Cable is used to measure and control traffic flow. Typical applications are for traffic control signals, safety cameras, variable speed control systems, flow monitoring and access control.

Standard and Approval

BS 6500, BS6195, BS 6360, BS 7655

Cable Construction

- **Conductor:** Stranded tinned copper, comply with BS 6360, Class 5
- **Insulation:** Black ethylene propylene rubber insulated (EPR), GP1, comply with BS 7655
- **Sheath:** Polychloroprene (PCP) sheath
- **Sheath Colour:** Black

Technical Characteristics

- **Rated voltage:** 450/750 volts
- **Conductor Resistance at 20°C:** 13.7ohms/km(1.5mm²)
8.21 ohms/km(2.5mm²)

- Minimum bending radius: $6 \times \varnothing$
- Temperature range: -30°C - $+85^{\circ}\text{C}$
